

ILRS Software Library Study Group
Minutes
28 October 2016
12:15
GFZ-Potsdam

1. Welcome and Introductions

2. New open source additions

A link was added to the ILRS software web page to Herstmonceaux's ADS-B based aircraft safety system software.

3. Work in progress

“IP disclosures” for MLRS software at The University of Texas are being finished with the UT Office of Commercialization. This disclosure will be forwarded to NASA, which funded software development and who makes the final decision on whether the software is open-sourced and by whom – NASA or UT.

4. Other anticipated contributions:

Nothing has appeared yet. Going through the steps to open source software is not a high priority to most groups. One set of software executables that was expected to be released through the web page, Erricos' UMBC data plotting software, is being converted to a web based application.

5. Next meeting

At the Riga workshop, 2017

Participants:

Members: Nonmembers:

Horst Mueller

Jan McGarry Kate Stevenson

Randall Ricklefs

Christian Schwatke

Mike Pearlman

Jens Steinborn

Julie Horvath

Scott Wezel

Carey Noll

Franck Reinquin

Anja Schlicht

John Degnan

Kalvis Salming

Jorge del Pino

Matt Wilkinson
